## Location of Nursery

Our main nursery and packing house is located one mile east of the city center of Gresham on Powell Blvd., thirteen miles east of Portland, "The City of Roses." saleable stock for the following year.

## Grading

We observe the American Association of Nurserymen rules in regard to grading roses. A No. 1 must have three canes, two of which are 18 inches in length (climbers 24 inches); a No. 1½, two or more 15 inch canes; a No. 2, two or more 12 inch canes. This set of regulations applies to most varieties but an exception is made of two inches per cane on a few of the lighter growing sorts. All others are classed as liners, which, when planted early in spring, will make good

## Packing

We pack light, but right. All our packing is done in pasteboard containers to save on transportation costs. Roots of plants are liberally packed in damp shingle-tow or peat moss to insure safe arrival at destination. In the case of rosebushes the packed weight per plant is approximately ½ lb., ⅓ lb., ¼ lb., for No.'s 1, 1½, and 2 respectively. We will be glad to trim tops back to any desired length to further save on shipping costs, which would be advisable in case the plants are to be potted for growing on.

## About Ordering

All orders, including C.O.D.'s, must be accompanied with a one-fourth deposit on same. Our digging time on roses is generally the latter part of October, depending on the moisture content of the soil. We will be glad to book orders ahead for fall or spring shipment; the fact is, we can hold roses dormant till the first of May, if necessary. Order early to insure best selection of varieties. Give second choice where possible.
